ABOUT ME

I am a self-taught front-end web developer with 10+ projects under my belt. I specialize in HTML, CSS, and JavaScript, and I am always looking for new and innovative ways to use these technologies to create amazing user experiences. Based in Navi Mumbai, Maharashtra

WORK EXPERIENCE

Web Developer

Pharmexus by ManojCreations0007 / 2023 - Present

As a highly driven and results-oriented Freelance Web Developer, I independently spearheaded and executed the comprehensive digital transformation for Pharmexus, meticulously overseeing every phase from initial conceptualization and strategic design to the robust development and seamless deployment of their official business website leveraging the intuitive Wix platform. This pivotal project not only established their foundational online presence but strategically transitioned their entire operational framework into the digital realm, cultivating a dynamic and expansive digital footprint that profoundly broadened their market reach, optimized customer accessibility, and fostered enhanced engagement. Demonstrating a sustained commitment to excellence, I have provided unwavering, end-to-end website management and proactive maintenance for over two years, vigilantly ensuring peak performance, upholding a superior user experience through continuous optimization, and consistently delivering fresh, relevant content, thereby maximizing their online visibility, streamlining operational workflows, and significantly contributing to their ongoing digital success and growth.
